

Región 10 Director

Lisa Crespo

North Sewickley Township Sewer Authority

Lisa Crespo has been with the North Sewickley Township Sewer Authority since 2008 and has been managing the Authority since 2014. In 2018, she was asked to manage the North Sewickley Township Water Authority and delightedly accepted that challenge. Becoming the manager of both Authorities, Lisa felt it was important to obtain her Collection System and Water Distribution licenses and is licensed as an operator for both systems and continues to remain hands on as much as possible so she can be as helpful as possible to her staff.

Lisa is currently working on her SEO Certification to expand to the private systems and handle that in house for the residents. Since managing both Authorities, she has started the process of legally combining the systems to one Municipal Authority. Through this journey of constant change, she has been attending PMAA conferences to be more involved with the most up to date information regarding authorities and their daily business.

Prior to becoming the Director of Region 10, Lisa served as the Assistant Director. She finds that her involvement in the organization and networking with colleagues is extremely rewarding and looks forward to serving as Director of Region 10 and growing within her position in the township.
