

WATER AND WASTEWATER ENGINEER

C.S. Davidson, Inc. is a multi-faceted consulting engineering firm providing a wide range of services to municipal and private clients. We are an employee-owned firm based in South Central PA with offices in York, Gettysburg, and Lancaster. Our firm is efficiently staffed with 85 employees ranging in experience from E.I.T. to P.E. and qualified support personnel.

The environmental team is eager to fill multiple positions at various levels of experience. As a member of this York-based team, you will actively assist the team in planning, permitting, and designing water and wastewater projects, including sewer collection systems, water and wastewater treatment plants, and drinking water distribution systems. Your ability to manage your time and coordinate with team members to achieve shared goals makes you a valuable member of this team.

Job Requirements:

- Bachelor's Degree in Civil Engineering
- Engineer-in-Training Certification
- Ability to handle multiple priorities
- Enjoys problem-solving
- Desirable Skills, but not required:
- Professional Engineer licensed in P.A.
- 5+ years of environmental engineering experience

At C.S. Davidson, Inc., we eagerly partner with our clients to develop solutions for the community's water and wastewater needs. We understand the connection between civil engineering and protecting the environment. If you have a learning mindset and seek growth opportunities, you may be an excellent fit for our team. Our success is shared with our employee-owners through competitive wages and benefits in addition to 401(k), Profit Sharing, and ESOP plans established to provide retirement income and financial security. Visit www.csdavidson.com/about to learn more about our tradition of investing in our communities. Send your cover letter and resume to Deena Trebilcock, Human Resource Manager, at dat@csdavidson.com. C.S. Davidson, Inc. is an equal opportunity employer.
